

	Materijali/Proizvodi <i>Materials/Products</i>	Vrsta ispitivanja <i>Type of test</i>	Metoda ispitivanja <i>Test method</i>	
1.	Med Honey	Određivanje sadržaja vode, refraktometrijski <i>Determination of moisture, refractometric method</i>	Metoda/Method 1	
2.		Određivanje električne provodnosti <i>Determination of electrical conductivity</i>	Metoda/Method 2	
3.		Određivanje slobodne kiselosti titracijom do pH 8,3 <i>Determination of free acidity by titration to pH 8,3</i>	Harmonised Methods of the International Honey Commission (2009)	Metoda/Method 4.1
4.		Određivanje hidroksimetilfurfurala (HMF) po White-u <i>Determination of hydroxymethylfurfural after White</i>		Metoda/Method 5.2
5.		Određivanje aktivnosti dijestaze po Schade-u <i>Determination of diastase activity after Schade</i>		Metoda/Method 6.1
6..	Kvalitativna melisopalnološka analiza <i>Qualitative melissopalynological analysis</i>	Vlastita metoda/ In-house method OMET-RU-MELISOPAL, rev.2, 2017-07-14 Modificirana/modified <i>Harmonised methods of melissopalynology: Method of qualitative melissopalynological analysis; Apidologie 35 (2004) S18-S25</i>
